

## GREEN ISSUES AND GLOBAL WARMING

**Given** the interest in these crucial issues for all our futures we would like to cover stories about what people in Welton are doing to improve the environment and reduce energy consumption or greenhouse gases. Have you made changes to your home, e.g., installed solar panels or a ground heat pump, or switched to an all-electric car. Have your efforts been successful? Or perhaps you have changed your lifestyle in other ways? Whatever you've done, we would love to hear your experiences, good or bad.
